DETAILED ACTION

This office action supplements the immediately preceding office action by correcting the omission of the ODP rejection set forth below.

Receipt of Amendments/Remarks filed on April 7, 2008 is acknowledged.

Claims 1, 10, 11, 13, 17, 19-29, 31, 33, and 34 have been amended. Claims 2-9, 12, 14-16 stand cancelled. Claims 1,10,11,13, and 17- 35 are being examined for patentability.

Double Patenting

Applicant's request to hold in abeyance the nonstatutory obviousness-type double patenting rejection of claims 1,10,11,13, and 17- 35 over claims 1, 8, 9, 15-32 of Application 10/522,157 is acknowledged. However, the Examiner cannot do this. Therefore, the nonstatutory obviousness-type double patenting rejection is maintained.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438,

Art Unit: 1616

164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1,10,11,13, and 17- 35 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 8, 9, 15-32 of Application No. 10522157. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instantly claimed subject matter embraces or is embraced by the co-pending application.

The copending application is directed to the same synergistic herbicidal compositions with the same main component, component A, a 3-heterocyclyl-substituted benzoyl derivative and component C which is at least one herbicidal compound selected from the group consisting of at least one of acetyl-CoA carboxylase inhibitors, acetolactate synthase inhibitors, amides, auxin herbicides, auxin transport inhibitors, carotenoid biosynthesis inhibitors, enolpyruvylshikimate 3-phosphate synthase inhibitors, glutamine synthase inhibitors, lipid biosynthesis inhibitors, mitosis inhibitors, protoporphyrinogen IX oxidase inhibitors, photosynthesis inhibitors, synergists, growth substances, cell wall biosynthesis inhibitors or a variety of other herbicides in a synergistically effective amount. Applicant is using open terminology (the term, comprising) which means that anything can be added to the composition. It would be obvious to add another component B, which is also a herbicide. Without any

Art Unit: 1616

unexpected results on record imparting the addition of component B, the inventions are not patentably distinct.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

None of the claims are allowed.
